▶ ISD and IBSSS invest in ISU's Long-Term Endowment.					

**Background:**

Board of Regents investment policy: <http://www.regents.iowa.gov/Policies/Chapter%207/chapter7.04.htm>

The Board of Regents employs an investment advisor for periodic review and evaluation of investment policy, strategy, and performance. Wilshire Consulting has been the investment advisor to the Board and Regent institutions since May 1996. Wilshire assists with the evaluation of the Board's investment policies and provides quarterly portfolio summary reports on fund and investment manager performance.

The Regent institutions maintain the following investment portfolios:

**OPERATING PORTFOLIOS**

The primary goals for investment prudence of the operating portfolios include safety of principal, maintenance of liquidity to match expected liabilities, and a reasonable return. The operating portfolio is to be managed to ensure funds are available to support operational needs.

**RESTRICTED BOND ACCOUNTS**

Bonds accounts include proceeds from bond issues. Accounts include project construction funds, sinking funds, and reserves. Each individual bond has specific investment restrictions which may vary by type of account with reserve accounts being the most restrictive as to types of authorized investment.

**INTERMEDIATE TERM PORTFOLIOS**

Intermediate term pools provide added flexibility for long-duration asset investment including quasi endowments, which are longer-term in nature but have no externally-imposed restriction that the principal remain intact.

**ENDOWMENT PORTFOLIOS**

The Board's investment policy defines endowment funds as primarily donor gifts and other funds received for specific purposes. The purpose of endowment funds is to provide:

- ▶ Intergenerational equity of income in perpetuity; and
- ▶ A stable income sufficient to meet the reasonable spending needs of the component endowments by keeping pace with inflation and not degrading the real value of the corpus over time.

Below are the Board authorized fund managers:

<u>MANAGER</u>	<u>TYPE</u>	<u>AUTHORIZED</u>

## *Capital Market Update*

---

## U.S. Equity

The U.S. stock market was up 4.9% for the second quarter, posting its eighth consecutive quarterly gain. Investors did not appear overly concerned with the worst quarter for Real GDP growth since the recession – and the largest revision of the initial estimates ever. Reactions from the Federal Reserve were muted, as well. The Fed continued tapering their asset purchases and suggested that they believe the downtick in growth and uptick in inflation are both temporary occurrences.

Large capitalization stocks led smaller shares by a sizeable amount for the quarter while results for growth stocks versus value were mixed. All economic sectors showed gains with Energy leading the way, by far. Utilities and Technology were also strong while Financials were the primary laggard.

After 44 consecutive months of job gains, the U.S. has finally recovered all of the jobs that were lost during 2008 and 2009, which totaled 8.7 million. The U.S. is now at an all-time high in terms of those employed although the labor force participation rate is down from 66.4% at year-end 2006 to 62.8% currently due, in part, to retirements within the “Baby Boom” generation. The rate has not been this low in 37 years, which is when that same generation had entered the work force.

## Non-U.S. Equity

The escalation of tensions between Russia and Ukraine threatened to impact important energy trade flows between Eastern and Western Europe, with much of the West proposing sanctions against Russia in response to its absorption of Crimea. The deterioration of Iraq’s fragile régime fueled additional investor concern during the quarter. However, this turmoil barely provided a pause for global stock markets’ upward march. With most major economies enjoying increased central bank support, and China’s government working to buoy the nation’s economic growth, equities returned healthy gains, with emerging market stocks especially strong.

## Fixed Income

Fixed income markets were notably strong in the second quarter, as U.S. Treasury yields fell at most maturities. Janet Yellen’s initial public statements as the new chair of the U.S. Fed reassured markets that accommodative monetary policy would stay in place in the short term. Yet again, investors looked to longer-maturity and higher-credit risk paper in search of yield, tightening investment-grade Corporate spreads to their lowest level since 2007. Emerging market bonds have performed strongly in the first half of 2014 as well, with frontier market financing activity reaching new levels.
