| Project Description and Total Budget | \$ 23,000 | July 2001 | Requested |

This project would provide an asphalt overlay and grading improvements to approximately 20,000 square feet of the Nature Trail to correct ponding water and deterioration of the trail's surface. The School reports that the deteriorating condition of this portion of the trail can be attributed to 1998 flood waters which altered the grade at the site and resulted in water accumulation and damage to the trail surface. The project is necessary to prevent further damage and ensure a normal life expectancy for the trail.
